15

CLAIMS

1. A method, comprising:

detecting when a new replaceable component is installed into a printing device;

determining if the new replaceable component has a particular brand name; and

providing a link to a restricted web site that is restricted to users of products having the particular brand name if the new replaceable component is determined to have the particular brand name.

- 2. The method as recited in claim 1, further comprising providing a link to an unrestricted web site that is accessible to users of products having the particular brand name and users of products not having the particular name brand.
- 3. The method as recited in claim 1, wherein the determining if the new replaceable component has a particular brand name further comprises retrieving a brand identifier from component memory integrated with the new replaceable component.
- 4. The method as recited in claim 3, wherein the component memory further comprises radio frequency identification (RFID) memory.

25

5. The method as recited in claim 1, wherein the providing a link to a restricted web site further comprises providing a link to a restricted web site via a dedicated web browser that can only be used to access the restricted web site.

5

6. The method as recited in claim 1, wherein: the printing device is a laser printer; and the replaceable component is a laser printer toner cartridge.

10

7.. A printing device, comprising:a replaceable component;means for identifying a brand name of the replaceable component;a detector configured to detect when the replaceable component is

15

initially installed;

a web browser configured to access a restricted web site that is restricted to users of replaceable components having a particular brand name; and

wherein the web browser is configured to access the restricted web site only if the brand name of the replaceable component is identified as being a replaceable component having the particular name brand.

10

15

- 8.. The printing device as recited in claim 7, wherein the web browser is a dedicated web browser that can only access the restricted web site; and further comprising a general web browser that is configured to provide access to one or more unrestricted web sites to users of products not having the particular brand name.
- 9. The printing device as recited in claim 7, wherein the means for identifying a name brand of a replaceable component further comprises an interrogator configured to read a brand identifier stored in component memory integrated with the replaceable component, the brand identifier uniquely identifying a brand name of the replaceable component.
- 10. The printing device as recited in claim 9, wherein: the interrogator further comprises a radio frequency identification (RFID) interrogator; and the component memory further comprises RFID memory.
- 11. The printing device as recited in claim 7, wherein the replaceable component further comprises a laser printer toner cartridge.
- 12. The printing device as recited in claim 7, wherein the replaceable component further comprises an ink jet printer ink cartridge.

15

- 13. A printing device replaceable component, comprising:
- a housing;
- a toner supply;

component memory that stores a brand identifier; and

- wherein the brand identifier is verified by a printing device in which the replaceable component is installed before the printing device provides access to a restricted web site.
 - 14. The printing device replaceable component as recited in claim 13, wherein the brand identifier can be used to uniquely identify a brand name of the replaceable component.
 - 15. The printing device replaceable component as recited in claim 13, wherein the restricted website is restricted to users of printing devices that have a particular brand name.
 - 16. One or more computer-readable media containing computerexecutable instructions that, when executed on a computer, perform the following steps:
- identifying a brand of a component in a printing device;

 providing access to a restricted web site of the brand of the component is a particular brand.

10

15

17. The one or more computer-readable media as recited in claim 16, further comprising computer-executable instructions that, when executed on a computer, perform the following additional step:

providing access to one or more unrestricted web sites, whether or not the component is the particular brand of component.

18. The one or more computer-readable media as recited in claim 16, further comprising computer-executable instructions that, when executed on a computer, perform the following additional step:

identifying a universal resource locator (URL) for the restricted web site.

- 19. The one or more computer-readable media as recited in claim 16, wherein the component is a replaceable component.
- 20. The one or more computer-readable media as recited in claim 16, wherein the one or more computer-readable media are contained in a printer.
